

## **UConn Soil Nutrient Analysis Laboratory**

6 Sherman Place, Union Cottage, Unit 5102 - Storrs, CT 06269 - (860) 486-4274 - soiltesting.cahnr.uconn.edu

104 Items You Can Compost: this is just a start – look around your house, office, local companies, etc. Remember, you can compost all these items, but you don't have to – do your homework and pick the ones that work for you!

## From the Kitchen - in addition to fruit and veggies

 Tip: any round item, like grapes – cut or smash them first to help with the decomposition process

<ol> <li>Coffee Filters – consider using filters that haven't been bleached white</li> <li>Stale coffee, cold tea</li> <li>Tea bags and loose tea</li> <li>Egg Shells – you can dry or crush so they will break down faster</li> <li>Used paper napkins</li> <li>Fruit pits, cores, and seeds – to speed up their decomposition, some people bake them in 350 degrees for 30 minutes, then grind, others will soak them overnight and then put in a blender – you can also try smashing them</li> <li>Corn cobs – consider chopping them up to speed decomposition</li> <li>Pizza boxes, ripped into smaller pieces</li> <li>Paper bags, either ripped or balled up</li> <li>The crumbs you sweep off the counters or floors</li> <li>Pasta – broken or leftover from cooking – with no or little sauce</li> <li>Rice – with little to no sauce</li> <li>Stale or moldy bread, crumbs, crust, etc.</li> <li>Paper towel rolls</li> <li>Stale/unwanted crackers</li> <li>Stale/unwanted creal</li> <li>Used paper plates (if they don't have a waxy coating)</li> <li>Cardboard containers that berries sometimes come in.</li> <li>Nut shells (except for black walnut shells which can be toxic to plants)</li> <li>Unwanted herbs and spices</li> <li>Stale/unwanted pretzels</li> <li>Fruit and veggie skins – may want to chop up first</li> <li>Fruit and veggie cores – apples, pineapple, etc., cut into smaller pieces</li> <li>Cereal boxes made from recycled materials with</li> </ol>
